(54) Title: A SHORT-SHAFTED ADENOVIRAL FIBER AND ITS USE

(57) Abstract

The present invention provides a short-shafted adenoviral fiber, a recombinant adenovirus comprising a short-shafted fiber, a vector comprising a short-shafted adenoviral fiber gene, and a method of targeting attachment of a short-shafted recombinant adenovirus to a cell so as to effect entry of the short-shafted recombinant adenovirus into the cell.
